

PHAM NGUYEN TUAN ANH

Front-end Developer Intern

OBJECTIVE

I aspire to become a professional Frontend Developer specializing in React and crafting engaging, user-friendly UI/UX experiences. While my primary focus is frontend development, I also have a strong foundation in backend technologies with Node.js, enabling me to build full-featured web applications. I have solid proficiency in HTML, CSS, JavaScript, and modern frontend frameworks.

Over the next two years, I strive to contribute to high-performance, responsive, and user-centric web applications while continuously enhancing my skills in animations, accessibility, and frontend performance optimization.

Soft skills :
Research
Stress Management
High concentration

LANGUAGE

English
Certificate BTEC HND Level 5

EDUCATION

University of Greenwich Vietnam
BSc (Hons) in Computing (Graduated: 2024)

WORK EXPERIENCE

Intern Backend Development – FPT Software (03/2024 - 06/2024)

- Trained in 3-layer architecture (Presentation, Business Logic, Data Access) to structure scalable applications.
- Developed RESTful APIs using .NET Core API, implementing CRUD operations and authentication.

PERSONAL PROJECTS

Architectural Design Showcase Website (Wix) – Freelance Project (02/2025 - 03/2025)

-  **Live Demo:** davdesign.net
- Developed a real estate architectural design showcase website using Wix, allowing clients to display and promote their design portfolio.
 - Designed a responsive UI to ensure smooth user experience across desktop, tablet, and mobile devices.
 - Integrated multilingual support to enhance accessibility for international customers.
 - Implemented live chat functionality to improve customer engagement and real-time communication.
 - Optimized SEO settings, meta tags, and structured data to improve search engine visibility.
 - Worked closely with clients to understand business needs and deliver a website aligned with their branding and marketing goals.

Booking Travel Web – Full-Stack Project (01/2024 - 4/2024)

 **Live Demo:** yourprojectlink.com
 **Source Code:** [GitHub Repo](#)

Team size: 1
Tech stack: React, TailwindCSS, TypeScript
Description:

- Developed an online travel booking system that allows users to search, book, and pay for tours.
- Designed a modern, responsive UI optimized for a seamless user experience.
- Built a RESTful API with Node.js (Express) and stored data using MongoDB.
- Implemented JWT authentication, enabling users to register, log in, and manage bookings.
